				[] Bacterial Tests Requested? EPA protcol requires immediate processing; therefore an automatic \$25/sample fee for GLP handling is required even in event testing is cancelled.			
				Cooler Return? [YES] [NO] Note : A blank or a NO means we will discard the container. A Yes obligates you to absorb the \$20 fee for return.			

WARNING: This form constitutes a contract for the requested services. A minimum handling fee may be applied if no tests are specified or requested tests are cancelled later. Laboratory reserves the right too dispose of samples if no information is provided within 72 hours of shipment. Woods End Labs is a USDA-APHIS Inspected and Approved facility.

THE MATERIAL SAMPLING SCHEMATIC

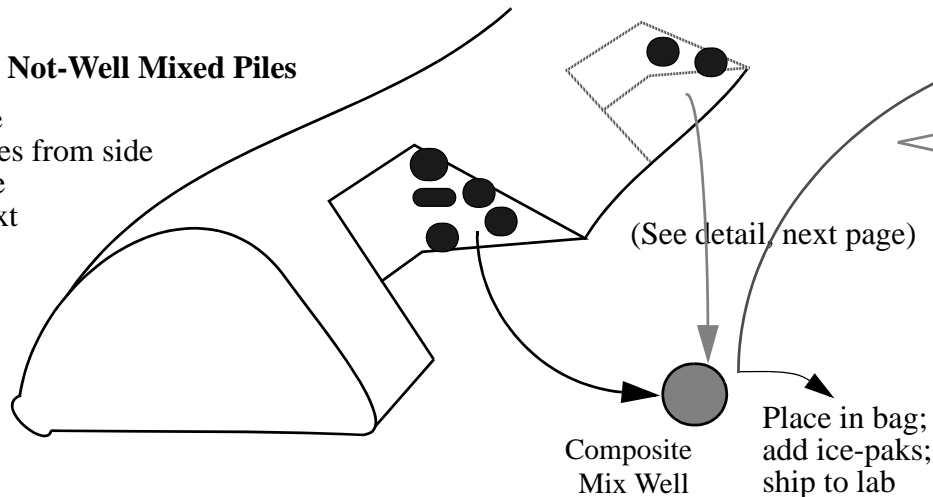

A. Sampling Turned Windrows*

- Mix pile as normal
- Remove samples along edge in 5-10 spots

B. Sampling Not-Well Mixed Piles

- Cut into pile
- Take samples from side exposed edge
- Cut into next location, etc.

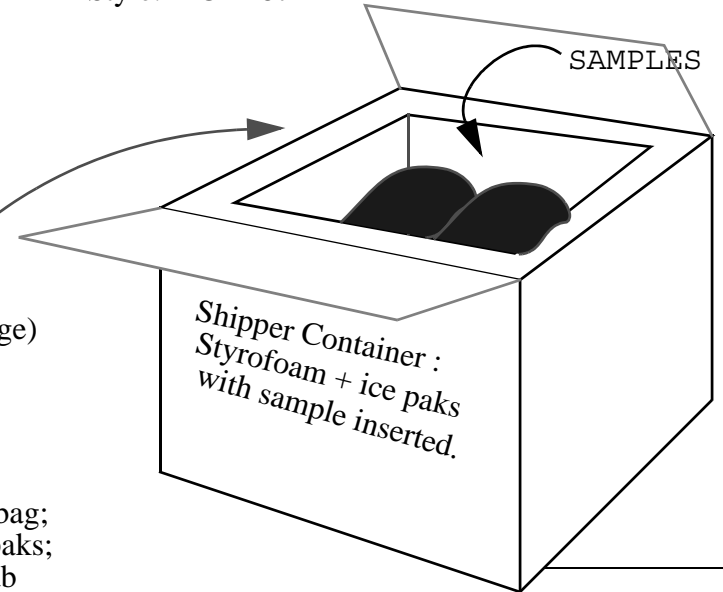

Source Of Sample Shipping Containers:

1- Polyfoam Packers Corp, Wheeling, IL 60090
800-323-7442 www.polyfoam.com

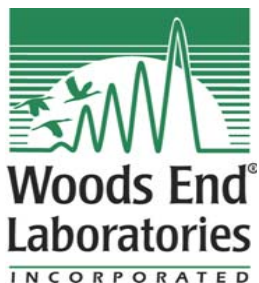

Containers are called : ThermoSafe and FreezSafe

2- TechPak Inc. 800-832-4725
Style: ZCLB87

A. Well Mixed Piles* (turned within 4 hours): Take 5 sub-samples each from each side of pile; mix-well in bucket and remove 1-gallon and ship to lab in cardboard/styrofoam containers with ice-paks.

B: Not Well-Mixed piles: Cut cross-section with loader; take 5-sub-samples each from side-wall of cut; repeat operation at 3-5 other locations; remove 1-gallon and ship to lab with ice-paks.

* Note - for sealed piles such as Polyflex or Gore-Tex material must be sampled as in Figure A. Double the number of sub-samples to make a composite if no mixing has been done.
